

## DEPARTMENT OF DEFENSE AND DEPARTMENT OF ENERGY NUCLEAR WEAPONS COUNCIL WASHINGTON, DC 20301-3050

The Honorable Howard P. "Buck" McKeon Chairman Committee on Armed Services U.S. House of Representatives Washington, DC 20515

AUG 0 2 2013

Dear Mr. Chairman:

In a July 18, 2013, letter to the Department of Energy (DOE) Deputy Chief Financial Officer, your committee outlined conditions for the obligation of the initial \$50 million of the DOE request to reprogram \$120 million from the Chemistry and Metallurgy Research Replacement–Nuclear Facility, project 04-D-125. Specifically, your letter requested the Nuclear Weapons Council (NWC) submit a detailed spend plan for these initial funds prior to obligating them.

The NWC endorses the enclosed spend plan documenting \$50 million in key investments needed to maintain continuity in plutonium operations at Los Alamos National Laboratory. While the \$50 million represents important initial investments, the remaining \$70 million is necessary for the National Nuclear Security Administration (NNSA) to execute its plutonium strategy. The NNSA and the Department of Defense Office of Cost Assessment and Program Evaluation are analyzing options for a long-term capability, and the NWC will inform Congress of the results this fall.

We thank you for your approval of the initial \$50 million of NNSA's \$120 million reprogramming request to begin investments that are a necessary first step toward achieving a production capability of 30 pits per year by FY 2021. Your continued support is appreciated.

Sincerely,

Chairman

Enclosure: As stated

cc:

The Honorable Adam Smith Ranking Member

## Department of Energy

National Nuclear Security Administration Washington DC 20585

July 24, 2013

OFFICE OF THE ADMINISTRATOR

The Honorable Frank Kendall
Chairman, Nuclear Weapons Council
Under Secretary of Defense for Acquisitions,
Technology and Logistics
U.S. Department of Defense
Washington, DC 20301

Dear Chairman Kondall:

Based on recent correspondence from the House Committee on Armed Services dated July 18, 2013, I am requesting the support of the Nuclear Weapons Council (NWC) to submit the enclosed spend plan. The plan outlines the investments associated with the initial \$50 million of our previously submitted request to reprogram \$120 million in fiscal year 2012 funds from the Chemistry and Metallurgy Research Replacement (CMRR) project.

The aforementioned letter requested that this information be submitted through the NWC prior to the National Nuclear Security Administration obligating the funds. I believe the spend plan fulfills their request and am willing to assist your office in any way possible to ensure this information gets to Chairman McKeon in a timely fashion.

If you have any questions, please contact Dr. Donald L. Cook, Deputy Administrator for Defense Programs, at (202) 586-2179.

Sincerely,

Edward Bruce Held Acting Administrator

Enclosure

Plutonium Scope Elements and Near Term Costs Main focus areas:

- \* Equipping RLUOB to higher material limit
- \* Re-purposing portions of PF-4
- \* Starting pre-conceptual work on new modular space
